Please note that the deadline for submission of assignment 1 is over.
I shall accept late submission till tomorrow 12 noon. Any submission after that will be considered as no submission.
Thanks,

Nandini Mukherjee

Dear all,

Here is the assignment for the next week.
1. Revise your yacc code to incorporate yyerror function to detect error in a string.
2. Study the difference between yyerror function and yyerrork macro and use the later one in your code. Report about this in the lab report.
3. Learn about YYRECOVERING () and also try to use it.

I think all students in your class have not submitted the assignments for the compiler design lab. The deadline has passed.
Any submission after midnight today will be considered as no submission.

There shall be a mid-term lab viva in the week starting from 19th. I shall announce the dates later.

Your next task will be a group project. Next week the lab classes will be held to assign the projects.

However, as we have few meetings and other activities, the class schedule will be announced through a separate email.

Thanks,

Nandini Mukherjee (Mukhopadhyay)
Professor
Department of Computer Science and Engineering
Jadavpur University
Kolkata
India
